DETAILED ACTION

1. This restriction is responsive to Election filed on June 7, 2000. It is appreciated that Applicant has elected Invention Group I, claims 1-12, 17-31 and 39-52. However, upon a detailed review, it appears that there are two restrictably distinct inventions within the group. Therefore, for an effective examination, this restriction is necessitated.

Election/Restriction

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 18-31, 39-52 drawn to interactive programming of television presentation by the viewer, classified in class 348, subclass 7.
 - II. Claims 8-17, drawn to Internet TV processing, classified in class 709, subclass230.
- 3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the interactive TV does not require the content to be retrieved from an Internet connection. The subcombination has separate utility, since the interactive TV system as claimed in Invention I can even be a standalone system.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- 5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
